-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

2. The drawings filed on 24 March 2005 are acceptable for examination.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1 – 5, 8 – 12, 15 – 17 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Meisburger (US Pub. No. 2005/0041229) in view of Johnson (US Pat. No. 6,628,390).

Art Unit: 2851

Meisburger has a lithographic exposure device having spatial light modulators (SLM) 120 and microlens 415. Meisburger does not disclose moving the SLMs or the microlens. Johnson teaches moving or shifting the microlens 102 in accord with a detected offset amount to prevent overlapping of the pattern as detected by a detector array 105. One of ordinary would be motivated to shift the microlens of the Meisburger device to prevent poor resolution causing by overlapping of the pattern. The processing unit determines the amount to shift the microlens and the servo unit moves the microlens.

Allowable Subject Matter

5. Claims 6, 7, 13, 14 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The following is a statement of reasons for the indication of allowable subject matter: The prior does not disclose at least the four – part detector as claimed or a trimming mechanism as claimed.
